

Sally (a girl) has 3 brothers. Each brother has 2 sisters. How many sisters does Sally have?

Sally has **1 sisters**.

Explanation: Sally is one of the sisters, and since each of her 3 brothers has 2 sisters, those two sisters are Sally and one other sister. Therefore, there is 1 sister besides Sally, which means Sally has 1 sister.

Sammy (a boy) has 3 sisters. Each sister has 2 brothers. How many brothers does Sammy have?

Sammy has **1 brother**.

Explanation: Sammy is one of the brothers. Since each of his 3 sisters has 2 brothers, and Sammy is one of them, there must be only 1 other brother besides Sammy. Therefore, Sammy has 1 brother.
